Success is difficult to measure because it can mean something different to each individual. In a basketball sense, success can be described as the best player that can loose. That could mean playing for the junior high school team, playing high school, playing college ball, playing pro. or just being a good player in the summer leagues. How much one wants to improve is up to each individual. First, a passion is required for the game. Why? It is an extremely complex and relevant game because basketball takes endless hours of work to be good. You really have to do more than just shoot around to succeed in the game. A love of the game is necessary to put in the proper work. Basketball, for those who take it seriously, is a sport for a year. Play as much as you can; anywhere and when you can. Basketball is a great game. Have fun. Learn from the players around you. Be careful what you do well. What can you do to practice and be as good as your opponents? Do other players have moves that will be effective for you? All great players learn from other people. Also, be well aware of what you do. Practice this kind of thing often. Take the power you have and make it stronger. If you're a fair shooter, shoot more and be a good shooter. If you're a good pitcher, shoot more and be a great shooter. Play as much as possible and improve on the things you do best, while also working on things you may not do quite well. Learn what you need to improve. Practice to be competent in skills where you are weaker. Well, try to improve the game everywhere. There are camps, leagues, clinics, intramurals and many other places to play. These all serve as opportunities. Join such programs and have fun and always try to learn. Listen to the people who are successful and find out what makes them successful. Try to model these behaviors. The more you practice, the better you play. When practicing, practice for a purpose. Split the game into the skills you need to develop and the skills you're good at. As I said, try to improve your weaknesses and try to make these skills stronger. Do a practice program and follow. Time to drill each and stay in the program. You have goals for each application session and work to achieve those goals. You can work with each other by working with a friend. The habits learned in basketball can be translated into every part of life. The work habits you develop as a player will also help you to become a better student, a better worker, a better teammate and a better overall person. • Set Goals• Work on strengths• Advance weaknesses• Play often• Take advantage of clinics, leagues, camps and programs• Learn from other people• And most importantly, love the game!
